🗁 PROJECTS

Video Store Application(2021)

- Video Store Application was designed to keep track of the employees, clients and all movies being rented of the store. This program shows the importance of having a proper application suitable for the good flow of a video store business. By having this application, it would be easier to add, delete, edit, or view the movies, clients, or employees that are active.

Web Content Management System(2022)

- A web content management system (WCMS) is a software system that provides website authoring, collaboration, and administration tools designed to allow users with little knowledge of web programming languages or markup languages to create and manage website content with relative ease.
